FIGHT FOR OUR FUTURE, NOT THEIR WARS!

Scrolling online, we see the horror taking place in our world, from the genocidal onslaught on Gaza to devastating wars in Ukraine and Iran. Climate chaos is destroying our planet, polluting our rivers and exhausting us from the heat. As our planet spirals into chaos, companies that sell weapons or pollute our planet make record profits at the expense of our future.

There is little support for our mental health, which is made worse by repressive measures in schools – like not being allowed to use the toilet, or isolation where students are treated like we're prisoners when we should be learning. Underfunding means a lack of support, with fewer specialist teachers. Our school dinners become lower quality and unaffordable, while we get fewer school trips and broken facilities that go for months without being fixed.

Outside of school and college, the cost-of-living crisis means we have to pay more and more for stationery, transport and food. Our youth spaces being closed and leisure centres costing more has meant we have little to do.

Join the International Youth Strike on November 20

This is why Socialist Students is a part of the International Youth Strike on Friday 20 November. We are calling on school, college and university students to walk out of class and protest on November 20 to send a message that we will fight for our futures, against this capitalist system.

There are over 20 organisations across Europe involved in the International Youth Strikes. The organisations in Germany have organised strikes of 50,000 school students walking out against military conscription this year. In Italy, tens of thousands of students protest every autumn and will do the same

this year on November 20. We can be part of it too! There are many issues affecting our futures; the point is to take action on November 20 to change it.

Organisation is strength

The super-rich have their political parties, media and organisations to further their interests. Workers have trade unions where workers discuss issues and take collective action to increase their living standards. If others can organise, why can't we?

We need student unions, where we meet with our classmates and take action over the issues that affect us. Individually we can be angry, but collectively we can take action.

We also need to channel our action against the entire profit-first capitalist system. Capitalism's main incentive is to create as much profit as possible, with our futures thrown on the scrap heap. We need a socialist society where working-class people collectively run society for the needs of all and the environment rather than the super-rich.

Teachers in the National Education Union are balloting for strike action later this year for increased funding for schools, so our teachers can better support our education. Let's organise together against the big-business politicians that want to divide us.

Socialist Students is active in schools, college and universities across the country. If you want to fight for a socialist future, build student unions and get organised for November 20, join Socialist Students today!

- **Fight for free education for all**
- **Fund public services, not their wars**
- **£15 minimum wage, no exemptions**
- **Make the super-rich pay**
- **Build student unions to give us a voice**

WHAT IS SOCIALIST STUDENTS?

Socialist Students is a democratic organisation of students fighting for a socialist transformation of society to meet the needs of all, not the profits of a few. We are active in universities, colleges and schools across the UK and work together with socialist youth organisations all around the world.

Our members are at the forefront of building resistance to all attacks on our futures, through campaigns and organising protests. We aim for united action between students and workers in a shared fight to take wealth and power out of the hands of the super-rich.
